

MediaFlow™

Encoding Software for Alcorn
McBride Video Players

SOFTWARE

MediaFlow is a software solution designed to encode your video files for Alcorn McBride players quickly and easily.

FEATURES:

- ▶ Easy to Use
- ▶ 1-2-3 Step Design
- ▶ Imports many video formats
- ▶ Exports H.264, MPEG2, TGA, or AMT
- ▶ Portable USB Option
- ▶ FTP Capability

For a complete workflow solution, simply use MediaFlow to encode your source material and transfer it to your Alcorn McBride unit.

MediaFlow software is preconfigured to produce video 100% compatible with Alcorn McBride products. It steps you through the process and quickly readies your content for use.

It imports many major video formats such as Quicktime MOV, ProRes, MP4, DPX, AVI, and much more. It then easily exports H.264 or MPEG2 with MPEG or AAC audio for our A/V Binloop HD and DVM8500 compressed playback products. MediaFlow will also ingest high-quality content and export compatible TGA or AMT files for playback within our A/V Binloop Uncompressed product.

Simplify your workflow with MediaFlow!
