

ShowTouch™

Touch Panel Interface for Alcorn McBride
Pro Series Controllers
Model SHOWTOUCH17

SHOW CONTROL

ShowTouch controls and monitors Ethernet enabled Alcorn McBride Show Controllers. It comes preloaded with everything needed to build a slick customized graphical user interface.

FEATURES:

- ▶ Easy to Use
- ▶ Rugged Metal Housing
- ▶ Built-in Tutorial
- ▶ Secure Interface
- ▶ Customizable
- ▶ No Complex Programming

APPLICATIONS:

- ▶ Theme Parks
- ▶ Museums
- ▶ Retail

Building a user interface is easy with our Touch software. You can build very elaborate screens with indicators, buttons, variables and faders. All of the configuration information is stored on the CompactFlash card in the ShowTouch and on the show controller. You can even password-protect individual screens.

The ShowTouch hardware is a rugged 17" embedded platform with no moving parts. If you need a different form factor, the Touch software can be used on any Window PC to give you even more flexibility.

ShowTouch and the Touch software are the perfect companions to the V16 Pro, V4 Pro and VCore and are an easy-to-use palate to create beautiful and functional user/maintenance interfaces.
