

# ShowTouch™

Complete Touch Panel Interface for Alcorn McBride Show Controllers

- ✓ Rugged Metal Housing
- ✓ Preloaded with **touch** the interface builder designed for show control.

ShowTouch can control and monitor Ethernet-enabled Alcorn McBride show controllers such as the V16 Pro. It comes preloaded with everything needed to build a graphical user interface.

Like all of our products, ShowTouch is designed to run 24/7 and with no moving parts to wear-out, it can be mounted just about anywhere while still providing a reliable and stable interface.

Configuration is easy using the Touch software. With just a few touches, you can set a security unlock code, upload the script running on the show controller and start designing a graphical interface with the included graphics library.

The same Touch software that runs on ShowTouch can be used on any Windows PC and is compatible with WinScript Live! The show controller script and interface can be designed and built before ever reaching the project site.

ShowTouch can be used in any size installation. Design options are fully customizable making this interface as unique as your project.

## Easy to use

- ✓ Built-in tutorial
- ✓ No complex programming
- ✓ Includes a graphics library and example interfaces
- ✓ Create multiple pages to separate and organize control items

## Secure Interface

- ✓ Prevents access to the underlying operating system
- ✓ No editing is allowed without an unlock code set by the designer
- ✓ Individual pages can be locked, each with its own unlock code

## Customizable

- ✓ Supports multiple image formats such as png, jpg, gif, and bmp
- ✓ Every page can have a different background image
- ✓ Design a creative interface by changing images, text color, font, and more

## Applications

- ▶ Theme Parks
- ▶ Museums
- ▶ Cruise Ships
- ▶ Restaurants
- ▶ Live Theater
- ▶ Retail

# ShowTouch™

Complete Touch Panel Interface for Alcorn McBride Show Controllers

Part Numbers	
SHOWTOUCH10	10.4" Resistive Touch Panel w/ Touch Software (larger sizes also available for special order)
System	
Storage	4GB Compact Flash (enough to hold hundreds of screens) (larger sizes and/or hard drive also available for special order)
Screen Resolution	800x600
Control	10/100 Ethernet
Physical	
Power Supply	12VDC 5A Max (60W Max)
Screen	10.4" TFT (larger sizes also available for special order)
Cooling	Fanless design with integrated heatsink
Materials	All metal with black aluminum front panel
Size	11.5"W x 8.9"H x 2.17 "D (29.2 cm W x 22.6 cm H x 5.504 cm D)
Operating Temperature	0°C (32°F) to 45 °C (113°F), free air circulation
Operating Environment	0-90% relative humidity, non-condensing
Power Supply Compliance	UL, CE, CSA, WEEE, RoHS
